vibers™ is a new material made from Elephant grass.

Elephant grass grows on local soil, on fallow land and is a very special plant. It takes up 4 times more CO₂ than a forest with trees, grows on poor soil, without the use of pesticides and needs little water. **vibers™** uses modern technology to make new products that are better for the environment. Natural fibers, strong, durable and beautiful.

You have something special in your hands...

We re-use existing molds for manufacturing our products and consciously use as little packaging material as possible. Reuse has our preference over new. This is better for the environment.

vibers™ is a piece of nature and, of course, you treat that with care. Don't put **vibers™** into the dishwasher and never use for hot drinks or the hot meal. To clean, wipe with a damp cloth or wash in lukewarm soapy water. Dry well. When you keep **vibers™** cool and dry, you will enjoy it for a long time.

A woman with long blonde hair, wearing a light blue shirt and a dark jacket, is smiling and looking down at a white cup she is holding. She is in a kitchen setting. On the counter in front of her are several items: a white coffee machine, a tall brown thermal carafe, a stack of brown mugs, a blue mug, a small potted plant, a loaf of bread in a white basket, and a glass dish. The background is dark, and the lighting is warm and focused on the woman and the counter.
