**Vibers inside**

Vibers develops advanced technology and materials with local Elephant grass fibres; the 100% natural miracle crop.

Vibers bioplastic is available as granulate for injection molding & extrusion and as film & sheet for, among others, thermoforming.

Applications include POS marketing materials, luxury packaging, plant pots and furniture.

## Benefits of our bioplastic

- Low ecological footprint
- Biobased
- Biodegradable
- Made in Holland
- Natural look and feel
- Vibers can be processed on existing injection molding, extrusion and thermoforming machines without hardware changes

## Where to buy our products

You can order Vibers bioplastic granulate and film directly from Vibers. Please contact us for options and prices. We are always happy to help.

Next to bioplastic we also offer Vibers paper & cardboard and Vibers bio-concrete.

Your product deserves Vibers. Let's change the world together.
